

Arm® Cortex®-R52 Based MPU RENESAS RZ/N2L GROUP

Easily Implement Industrial Ethernet and TSN on Industrial Systems

The RZ/N2L industrial Ethernet microprocessor (MPU) easily adds network functionality onto industrial equipment and machine. RZ/N2L is optimized as a dedicated networking companion chip that can easily implement industrial Ethernet communication and TSN in industrial equipment. The RZ/N2L is a single chip solution for both industrial network and application processing.

Key Features

- Arm® Cortex®-R52 @ Max 400MHz
- A tightly coupled memory (256KB) directly connected to CPU
- 3-port Gigabit Ethernet switch supporting next-generation network standard TSN and EtherCAT® slave controller
- Host interface allows application CPU to directly connect to RZ/N2L, and access at high speed
- Application CPU can directly access to the system RAM of RZ/N2L
- ELC (Event Link Controller) can be operated without the support of CPU processing
- Supports functional safety like a safety MCU

Benefits

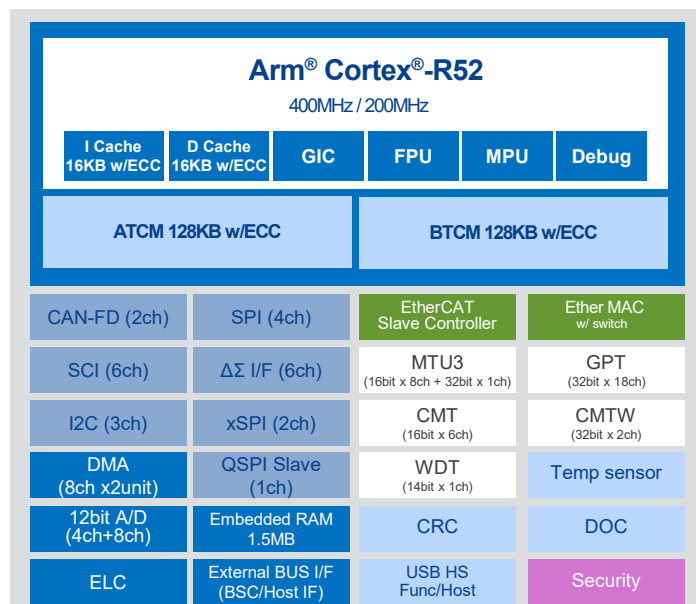

- Enable next-generation network standard TSN, and major industrial Ethernet protocols such as EtherCAT®, PROFINET, EtherNet/IP™
- Add industrial Ethernet features to industrial equipment without major system change
- Operate industrial Ethernet and user application on one chip
- Realize synchronized operation with low latency to the time synchronization in TSN network
- Accelerate functional safety (FuSa) development and certification through upcoming certified FuSa solution for RZ/N2L
